SUMMARY

Software developer with a knack for organization, creativity and empathy. Successful in creating user-friendly full stack applications and learning new concepts and technologies quickly. A background in business operations leadership and customer service provides ability in building client and coworker relationships. Truly delighted to engage in collaboration that uplifts and strengthens original ideas that results in powerful innovation.

SKILLS

JavaScript, Vue 3, MVCS, HTML5, CSS3, Bootstrap, Git, NodeJS, MongoDB, Restful APIs, Auth0, Agile, SCRUM

EXPERIENCE

Student Software Developer | Codeworks, 3/2021 - 6/2021

- Currently completing approximately 500 course hours and 20 projects to learn new technologies and best practices in software development from senior developers
- Designed several full-stack applications individually and collaboratively
- Implemented SCRUM methods and acted as product owner for a full stack application on a team of 5 developers. Implemented object oriented programming to complete sprint with our MVP

Financial Director | Kangaroo Clubhouse LLC, Nampa ID, 3/2018 – 2/2021

- Directed financial operations for a \$1M+/yr company with 6 locations. Duties included A/R, A/P, P&L, Balance sheets, treasury management (managing company cash flow and bank accounts), managing company relationship with accounting firm, and bi-monthly payroll processing for 60+ employees
- Took on a SME role in day-to-day help and training of leadership personnel with the company's industry-specific software, Procure Software
- Took additional responsibility of other aspects of general operations including managing company insurance policies, website and social media management, handbook and pay scale creation, Idaho early childhood education licensing and facility licensing

Vault Clerk, Backup Payroll Clerk | Costco Wholesale 5/2014 – 4/2018

- Completed 3-6 large daily deposits with high level of accuracy and organization
- Managed simultaneous loans for up to 15 cash registers from vault at any given time
- Ordered multiple high-volume weekly change orders.
- Took initiative to request cross-training in other administrative duties to increase my value as an employee. Learned payroll, HR and expenses from my administration coworkers and managers

APPLICATIONS

NeatPantry | Product Owner and Collaborator on a team of 5 developers

- Collaborated on a full-stack pantry inventory management application. Allows users to create multiple households, invite household members, create shelves with items that can either be auto-added to their shopping list at certain item quantity or receive a notification at that item quantity
- Pitched an original idea, led as product owner, led stand ups, sprint reviews, code reviews and managed Github repository branching and merging

Kanban | Partner Collaborator

- Built a "trello"-inspired full-stack application with a focus on pair-programming using JavaScript, Vue 3, HTML5, CSS3, Node.js, MongoDB & Mongoose, Auth0 and developing an API
- Succeeded in timely delivery by implementing SCRUM methods
